

**Project Name : Le Arabia**

**Key Features of the project :**

E-Commerce mobile app for ordering food item from the restaurant

**Project Description:**

LeArabia specialize in Arabian Cuisine and have been serving since 2010

**Services Provided:**

Solution,Design and Architecture

**Solution Provided**

The mobile application for LeArabia benefit the customers to order food with ease and get it delivered at doorstep. The customers can view categories, menus and order food of there choice. The cart provides an optimized view about the ordered products and its updating. The user can easily increment the quantity of a product in the cart and track the order history. The integration of map module helps the user to locate the outlets effectively. The app built in latest technology helps the users place orders through the app and schedules their order pickup or can also opt home delivery. The provision to view Recent Orders and spot the restaurant location and its directions via a map interface helps the users in a hassle free usage of the app.

**Technologies used in Development :**

Android/PHP/MySQL
