

Project Name: Multi touch Application

Project Description

Neologix designed and developed a multi touch application for Sharjah government, This is a very prestigious project which we had developed for Sharjah E-government, which gives information regarding various departments under government of Sharjah. This app is designed with an intention to give an easy access to the people of Sharjah regarding various departments and their activities under government of Sharjah. In this app, people can login to the app to fetch the information regarding various departments like Sharjah Electricity and Water Authority, Social Services Department, Finance Department etc.

Business Challenges

Sharjah Government was looking at innovative ways to build relationships with their citizens. Sharjah Government intends to give an easy access to its people regarding the functionalities of various departments. This is an intuitive system purely UI Based developed for Sharjah e-government to showcase in 50 majlis tables for their exhibitions. The people attending the stand would sit and go through the system intuitively.

Solution and Benefits

- Neologix developed an app for Sharjah E Government to give information regarding the various departments to the people.
- Users can fetch the information regarding various departments of Government of Sharjah through a single click.
- By clicking on the icons of different departments, it will redirect to the respective pages and the user can easily get the required information.

Technologies Used

HTML 5, CSS 5, JQuery
